

The back seat on the night of the incident.

Page 22 redacted for the following reason:

(b)(6)

The seat where the woman was sitting when she was struck by the round. Notice the fragmentation and the trajectory of the round again represented by the antenna.

The hole in the glass, from the inside of the car looking out. On the inside, the glass has been dug out, to form an upside down crater suggesting that the impact came from the *inside* not from the outside like from a rock or something else.

The hole in the windshield from the outside of the vehicle.

Projectile Comparison Presentation
