**MEMORANDUM FOR COMMANDER 256<sup>th</sup> BRIGADE COMBAT TEAM**

**SUBJECT: AR 15-6, BCT No.: 05-96 (Shooting of Local National at Entry Control Point, Forward Operating Base [REDACTED], Iraq)**

1. Enclosed is the 15-6 investigation outlining the circumstances that resulted in the shooting of a local national vehicle. As a result of the incident three Iraqi citizens were killed and five Iraqi citizens were wounded. The shooting occurred in the vicinity of the entry control point of the Forward Operating Base [REDACTED] Iraq [REDACTED] on 15 March 2005.

**2. SUMMARY:**

On 151823MAR05 PFC [REDACTED] and SPC [REDACTED] identified a green vehicle moving at a high rate of speed towards Forward Operating Base (FOB) [REDACTED] [REDACTED] entry control point from Tower 2. The vehicle showed no caution in approach and proceeded past both the Arabic and English warning signs that the use of deadly force was authorized. PFC [REDACTED] first observed the vehicle approaching the entry control point when the vehicle was approximately 300 meters from his position in Tower 2. Noticing that the vehicle maintained a high rate of speed, PFC [REDACTED] alerted his team leader, SPC [REDACTED], to come over to Tower 2. SPC [REDACTED] made his way over to Tower 2 and observed the vehicle approaching the entry control point. The vehicle had already passed the warning fires trigger line. SPC [REDACTED] proceeded to fire two warning shots in front of the vehicle. The vehicle failed to stop and was approaching the disabling trigger fires line. When the vehicle passed the disabling fires line SPC [REDACTED] proceeded to fire a disabling shot into the hood of the vehicle and instructed PFC [REDACTED] to fire a burst of M240B into the hood of the vehicle. The vehicle still maintained a high rate of speed as it continued along the entry control point. At this point SPC [REDACTED] PFC [REDACTED], company commander, company executive officer, platoon sergeant and approximately five other soldiers that had made their way to Tower 2 after hearing the warning shots, initiated lethal fires on the vehicle as it had passed the lethal fires control line. The vehicle came to a stop approximately 50 meters after passing through the lethal fires line (100 meters from Tower 2), at which time the cease-fire was initiated. The vehicle was then observed by both the naked eye and optics to ensure that it was not a possible VBIED. The initial assessment by the chain of command was that the vehicle was a possible VBIED and EOD was alerted. (The vehicle entered the clearly marked entry control point at a high rate of speed and the chassis was sitting unusually low to the ground). After a few moments of observation, soldiers noticed movement and were able to determine that there were children inside the vehicle. The company commander ordered his quick reaction force (QRF) to secure the immediate site around the vehicle and began to

administer first aid to the wounded passengers inside the vehicle. The incident resulted in 3x Iraqi KIAs, 5x Iraqi WIAs, and 1x Iraqi uninjured.

The proven tactics, techniques, procedures and controls that are currently emplace and practiced at the entry control point have been proven to stop previous VBIED attacks at FOB [REDACTED]. The historical information provided by 2/24 during the TOA showed that FOB [REDACTED] was targeted six times with VBIED and had one successful detonation that resulted in two coalition KIAs.

3. FACTS:

- a) How many local nationals were involved in the incident?
  1. Nine Iraqi citizens were involved in the incident.
    - 3x KIA (1x Adult Male, 1x Adult Female, and 1x Female Child)
    - 5x WIA (1x Male Child, 2x Adult Females, 2x Females Child)
    - 1x uninjured female child.
- b) What is the description of the vehicle(s) involved in the incident?
  1. Vehicle involved in the incident is Turquoise in color, four door Ford Tempo.
- c) When and where was the first warning shot(s) fired?
  1. 2x-warning shots were fired in front of the vehicle after it had passed the warning shot trigger line.
- d) When and where were the disabling shots fired?
  1. 2x-disabling shots were fired into the vehicle's front hood with M16A4 after it had crossed the disabling shot trigger line.
  2. 1x-7 to 10 round burst was fired into the vehicle's hood from an M240B after it had crossed the disabling shot trigger line.  
\*The soldiers fired the disabling shots into the hood of the vehicle due to the angle of fire that is presented by the location of Tower 2. Tower 2 is located on the roof of a three-story building.
- e) By what means is the unit marking the trigger lines for initiating warning, disabling and lethal fires?
  1. Orange traffic cones mark the trigger lines as to when and what type of escalated fires to initiate.
- f) Are there warning signs posted at the entry control point?
  1. The entry control point is clearly marked and warning signs are posted in both Arabic and English. Arrows also clearly delineate the correct direction of civilian traffic to avoid entering the entry control point.
- g) When did the unit last receive / conduct traffic control point training?
  1. The unit received and conducted the following ROE and traffic control point training / briefings:
    - Pre-NTC ROE Training (OCT04)

- NTC RSOI and rotational ROE Training (OCT/NOV04)
- Home Station ROE training (Pre-deployment training) (JAN04)
- Kuwait RSOI ROE Vignette Training (FEB05)
- ECP Duties: NTC (OCT/NOV04)
- ECP Duties: [REDACTED] during the Left Seat/Right Seat Ride (at guard posts) (MAR05)
- ECP Duties: [REDACTED] Guard Force and Threat Briefing (SPC [REDACTED], PFC [REDACTED]): 151700MAR05

h) Was the guard mount briefed on their duties responsibilities and threat in the area of operations prior to execution of their duties?

1. The guard mount received its shift briefing and threat briefing at approximately 151711MAR05.
2. The use and ROE of escalated force is part of the guard mount briefing.

i) Were there lights available at the entry control point?

1. There is no artificial light source positioned at the entrance of the entry control point at FOB [REDACTED]. Artificial light sources are purposely not used by the company as not to provide an easily identifiable target reference point for both direct and indirect fires. Additionally given the time of day the use of artificial light was not warranted.

j) What equipment is being utilized to maintain the entry control point?

1. Warning signs (written in both Arabic and English)
2. Orange traffic cones to identify trigger lines and when the guard mount is to respond with escalated force.
3. Class IV Barrier Materials: Hesco Baskets, Concertina Wire and rubble.
4. Binoculars, Magnified optics for M240B, M240B, M16A4, Reinforced Bunker, MBITR Radio.

k) When was the vehicle first sighted and by whom?

1. The vehicle was first observed as a possible threat approximately 300 meters from the entry control point.
2. PFC [REDACTED], first sighted the vehicle and alerted his supervisor.

l) When was the use of direct fire as part of the escalated force ROE initiated?

1. The use of escalated force (warning shots fired in front of the vehicle) was first initiated approximately 50 meters past the 1<sup>st</sup> trigger line (approx 150 meters from the guard post) by SPC [REDACTED].

m) When were disabling fires initiated and at what part of the vehicle?

1. The continued use of escalated force (disabling fires) was initiated once the vehicle crossed the 2<sup>nd</sup> trigger line by both SPC [REDACTED] and PFC [REDACTED].

2. Disabling fires were shot into the hood of the vehicle. As previously mentioned given the location and the angle of fire that is presented from tower 2 the soldiers disabling fires are aimed towards the front of the hood of the vehicle.
- n) When were lethal fires initiated and when was cease fire initiated?
  1. Lethal fires were initiated once the vehicle had passed through the lethal fires line in the entry control point.
  2. The vehicle came to a stop approximately 50 meters past the lethal fires line.

#### 4. FINDINGS.

- a) All personnel involved in the incident acted in accordance with the "CFLCC Rules For Use Of Force" Card (as of 011800ZNOV03). The soldiers believed that they were acting in self-defense; and that their acts were necessary to prevent the destruction of both military and civilian lives and property.
- b) The two soldiers (SPC ██████████ and PFC ██████████) acted in accordance with the CFLCC guidance in the use "Escalation of Force" with direct fire. All shots were aimed (warning shots in front of the vehicle; disabling shots into the engine compartment of the vehicle; lethal shots were focused at the drivers side of the vehicle); the cease fire order was given once the vehicle was disabled and came to a complete stop.
- c) The unit controlled fires, assessed the situation, and immediately rendered necessary aid and assistance to the occupants of the vehicle. Their response was immediate and disciplined, particularly the actions to provide medical attention and MEDEVAC.

#### 5. RECOMMENDATION.

- a) The following recommendations may not have prevented the incident from occurring however, they will at a minimum further restrict the accessibility of the FOB through the entry control point:
  - a. The use of a blocking vehicle (as a minimum) to prevent the current un-obstructed ability to enter within the confines of the FOB. Current operations of the FOB does not include the use of some form of physical obstruction to prevent unauthorized access into FOB ██████████'s perimeter.
  - b. Emplacement of Jersey barriers. Emplace Jersey barriers throughout the entry control point requiring both in-bound and out-bound FOB traffic to negotiate a series of right hand and chicane turns. Requiring the vehicles negotiating the series of turns to slow their speed when inside the entry control point.

The guard fired (2) warning shots into the ground in front of the vehicle and off to the side. The vehicle continued to approach the gate at a high rate of speed and did not make any attempt to slow their rate of travel. The guard then fired (1) shot into the hood of the vehicle. The vehicle continued past the serpentine at a high rate of speed. The vehicle continued towards the gate passing the trigger line. The guards then perceived the vehicle as hostile and engaged the vehicle with killing bursts into the cab with M240 and M249. After a cease fire, the guards observed the vehicle with optics to determine if the vehicle was a VBIED. I, [REDACTED], WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:

On 15Mar05 at or around 1830, I was on roof guard and noticed a car speeding down [REDACTED] towards the FOB. The car passed the first cone where it was supposed to turn approximately grid [REDACTED]. I then radioed to my team leader to come help with the situation. The whole time the car was coming it made no effort to stop. The car was still moving at a high rate of speed when it passed the sign that stated "Deadly force authorized, no civilian traffic". SPC [REDACTED] then fired a warning shot at the ground ahead of the car then one at the grill of the car. I fired my disabling M240B burst into the engine as the car was coming around the Hesco baskets. The vehicle did not stop so I fired killing bursts into the driver side window. I fired until the cease fire was called and the threat had been stopped.

1. [REDACTED], WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:

At approximately 1830 I was eating supper with my officers when I heard a shot fired from the roof of the CP building. There was a gap of a couple seconds when I heard a second shot. I ran to my room to get my gear when I heard a burst of automatic weapons fire. I ran upstairs all the while hearing more firing. When I got to the roof top (Tower 2) I saw the green sedan that was 50m or more past the seventeen (HESCO). I fired five rounds into the driver's side window. There was about 9 personnel on the roof when I called cease fire. Each man echoed "cease fire" in accordance with the company SCG. Control of fires was managed by SPC [REDACTED] and SFC [REDACTED]. Fires were oriented on the driver's side window. After "cease fire" the SCG began consolidation of the guard force. We dispatched a squad plus to secure casualties after examining the car with optics and confirming it was not a threat.

1. I, [REDACTED], WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:

That while on guard at the front gate to our Camp [REDACTED] at approximately 1845, PFC [REDACTED] started to tell me about a approaching vehicle, as I heard the first warning shot. As I moved to the east facing location to observe the car the second warning shot was fired. As I reached the firing position the [REDACTED] position on top of the building started to fire on the vehicle. I saw the vehicle was not stopping so I started to lay suppressive fire as well. As I was re-loading my rifle I noticed all firing had stopped. I then maintained security on the vehicle until personnel closed in on the objective. At that time I changed my efforts to the western facing [REDACTED] window of the bunker and maintained security in that direction. During that time I checked on PFC [REDACTED] and myself for any injuries. I found none and called in our status at the [REDACTED] gate.

  - At apx. 1900 hrs. a green Saturn body style vehicle approached the Northern gate of FOB [REDACTED] (REDACTED) at a high rate of speed. The guard fired (2) warning shots into the ground in front of the vehicle and off to the side. The vehicle continued to approach the gate at a high rate of speed and did not make any attempt to slow their rate of travel. The guard then fired (1) shot into the hood of the vehicle. The vehicle continued past the serpentine at a high rate of speed. The vehicle continued towards the gate passing the trigger line. The guards then perceived the vehicle as hostile and engaged the vehicle with killing bursts into the cab with M240 and M249. After a cease fire, the guards observed the vehicle with optics to determine if the vehicle was a VBIED. Initial observation of the vehicle was that it was riding low on its shocks, and had the appearance of a VBIED. Initial decision was to contact EOD; however, after further evaluation they observed children standing in the vehicle. Guards then approached the vehicle to further evaluate the situation. Upon further review the guards determined the vehicle was not a threat and immediately began treating the injured IZ's. There was a total of (9) passengers in the vehicle ((3) adult males – ages unknown, (1) adult female – age unknown, (4) female children – between the ages of (2) – (8), (1) male child – approx. # TASK FORCE TCP SOP

TR 2-30 AR OF TACOP

## Card 5: Traffic Control Points

TCPs are used to interdict the movement of contraband materials and enemy personnel through the TF AO. Contraband material can consist of weapons, stolen vehicles, stolen goods such as electrical wire, etc. TCPs incur risk from hostile attacks from their stationary nature, so it is imperative that soldiers at all levels maintain their vigilance and do not become complacent during execution.

1. TCP is a PLT mission at a minimum. Task organizes tanks, Bradleys and Infantry, as required.
2. One section provides 360 degree security (Defenses, direct and indirect) of the TCP.
3. One section executes the TCP operation.
  - o One vehicle provides overwatch of the TCP search operation.
  - o One two man (minimum) team to secure personnel.
4. Utilize TCP warning signs placed out minimum of 100 and 150m.
5. Utilize approach to control approaching cars. (example - Hatch upright in front of approaching vehicle to slow driver down. Once driver is slowed and approaching TCP shine a smaller light to control with driver and distract him through the TCP)
6. Establish TCP in a position that affords protection to the TCP crew and restricts the ability of approaching cars from avoiding the TCP. (try to protect a flank.)
7. Use cones, wire, etc to assist in controlling the TCP site.
8. TCPs remain established for no more than 30-45 minutes in any one place.
9. TCP Platoon Leaders coordinates with flank units for additional security (flank sites, OPs, FOBs, etc)
10. Plan for detainees. Once you've detained someone you've fixed your element.
11. Do not allow vehicles or bystanders to stop and observe what is happening (try to be a Reactor). Stop and detain as necessary for inspecting a military operation.
12. A blocking vehicle (M1 or M2) is positioned and ready to stop any vehicle attempting to escape or bypass the TCP.
13. Plan for moving cars to the impound lot!
14. Allow a lane for military traffic to pass.
15. All weapons should be shouldered and at the ready, not slung over the shoulder.

# TASK FORCE FIXED SITE SOP

## 100.12. Fixed Site Security

Hardened sites remain targets of opportunity for AIF attacks. However, by continually improving upon the sites security (pales, stand off, HESCOs, etc.) attacks can be discouraged and defeated. Security requirements remain METT-TC documents but should be similar to FOB security requirements (crew served, weapons status, etc.)

**Established Site.** We already have some form of security established; however, leadership needs to receive a battle handover from the previously occupying unit and then conduct their own independent evaluation of the sites security.

1. Arrive early. When relieving a unit at a fixed site it is important to conduct a thorough battle hand over and learn of the daily activities, threat level and other information that may be specific to the site.

2. Come equipped. Depending on mission length, ensure you bring all necessary equipment (cold weather/sleeping gear, food, additional gear bags, etc.) that will last through the duration of your shift.

3. Maintain security. Ensure soldiers/PS understand their mission and responsibilities. Establish a 'worst-case' plan and modify it as mission dictates. Leaders need to check on soldiers and evaluate individual guard posts for potential 'soft' spots in security. If the enemy perceives the site as being too difficult to attack they are less likely to attack the site.

4. Conducting battle hand over. When being relieved it is important to pass as much information (suspicious vehicles/persons, guard issues, threat level, etc.) as possible to the relieving force and answer any questions they may pose. Provide security by having them incoming unit man guard posts in addition to the current force. This allows soldiers to pass along specific post information.

## Established Sites

1. Establish a perimeter of 150 m from outer perimeter to inner sites.
2. Deny use of adjacent buildings.

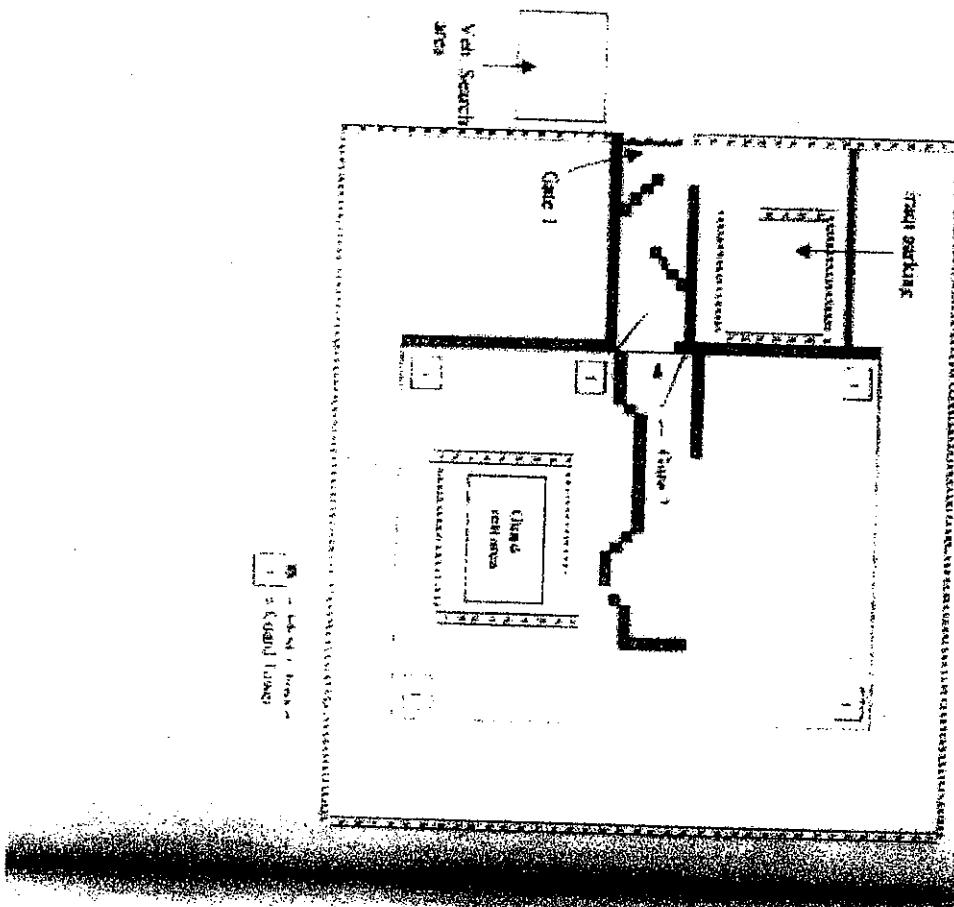

3. Conduct random random patrols outside perimeter (with OC weapons if necessary) to check perimeter integrity and possible points of weakness.

4. Control access to main gate.

5. Prepare for defend with the perimeter.
