

Mr. President, the America we believe in is not *your* America.

This is how we see the state of the union:

- ★ In our America, government does not secretly spy on American citizens without a warrant.
- ★ In our America, government does not secretly search our homes and library records without telling us.
- ★ In our America, government does not kidnap people off the streets without charge, secretly fly them to other countries, torture them, only to let them go after learning it was a mistake.
- ★ In our America, government does not hold people in Guantánamo for four years without charging them with a crime.
- ★ In our America, government does not enact policies that allow torture, with officials hiding behind rank to pass the blame.
- ★ And in our America, no one is above the law, not even the President.

Mr. President, the state of our union cannot be strong if you continue to violate our Constitution and our fundamental freedoms.

Tell the White House that a Special Counsel must be appointed to investigate President Bush's illegal NSA spying. Speak out in your community.
