**GENERAL LEGAL GUIDANCE**

**1. Freedom of Information Act (FOIA)**

G&T recognizes that much of the information submitted in the course of applying for funding under this program, or provided in the course of its grant management activities, may be considered law enforcement sensitive or otherwise important to national security interests. This may include threat, risk, and needs assessment information, and discussions of demographics, transportation, public works, and industrial and public health infrastructures. While this information under Federal control is subject to requests made pursuant to the Freedom of Information Act, 5. U.S.C. §552, all determinations concerning the release of information of this nature are made on a case-by-case basis by the DIIS FOIA Office and may likely fall within one or more of the available exemptions under the Act. Applicants are encouraged to consult their own State and local laws and regulations regarding the release of information, which should be considered when reporting sensitive matters in the grant application, needs assessment and strategic planning process. Applicants may also consult their G&T Preparedness Officer regarding concerns or questions about the release of information under State and local laws. Grantees should be familiar with the regulations governing protected critical infrastructure information (6 C.F.R. Part 29) and sensitive security information (49 C.F.R. Part 1520), as these designations may provide additional protection to certain classes of homeland security information.

**2. Services to Limited English Proficient (LEP) Persons**

Recipients of G&T financial assistance are required to comply with several Federal civil rights laws, including Title VI of the Civil Rights Act of 1964, as amended. These laws prohibit discrimination on the basis of race, color, religion, national origin, and sex in the delivery of services. National origin discrimination includes discrimination on the basis of limited English proficiency. To ensure compliance with Title VI, recipients are required to take reasonable steps to ensure that LEP persons have meaningful access to their programs. Meaningful access may entail providing language assistance services, including oral and written translation, where necessary. Grantees are encouraged to consider the need for language services for LEP persons served or encountered both in developing their proposals and budgets and in conducting their programs and activities. Reasonable costs associated with providing meaningful access for LEP individuals are considered allowable program costs. For additional information, please see http://www.lep.gov.

**3. Integrating Individuals with Disabilities into Emergency Planning**

Executive Order #13347, entitled “Individuals with Disabilities in Emergency Preparedness” and signed in July 2004, requires the Federal government to support safety and security for individuals with disabilities in situations involving disasters, including earthquakes, tornadoes, fires, floods, hurricanes, and acts of terrorism. Consequently, Federal agencies are required to: 1)
encourage consideration of the unique needs of employees and individuals with disabilities served by State, local, and tribal governments and private organizations and individuals in emergency preparedness planning; and, 2) facilitate cooperation among Federal, State, local, and tribal governments and private organizations and individuals in the implementation of emergency preparedness plans as they relate to individuals with disabilities. A January 2005 letter to Governors from Secretary Ridge asked States to consider several steps in protecting individuals with disabilities: • Ensure that your State's existing emergency preparedness plans are as comprehensive as possible with regard to the issues facing individuals with disabilities • Ensure that emergency information and resources are available by accessible means and in accessible formats • Consider expending Federal homeland security dollars on initiatives that address and/or respond to the needs of individuals with disabilities for emergency preparedness, response, and recovery. Grantees are encouraged to use funding for activities that integrate people with disabilities into their planning and response processes. Grantees can consult Census data for their geographic location to discover the percentage of the population that is categorized as individuals with disabilities. Further information can be found at the Disability and Emergency Preparedness Resource Center at www.dhs.gov/disabilitypreparedness. This Resource Center provides information to assist emergency managers and in planning and response efforts related to people with disabilities.

4. Buy American Act Compliance
In general, grantees are not required to comport with the restrictions of the Buy American Act (41 U.S.C. 10a). However, grants authorized under the Stafford Act, including the EMPG program, must follow these standards. The Buy American Act requires that all materials purchased be produced in the United States, unless such materials are not available, or such a purchase would not be in the public interest

Summary

The Maryland Transportation Authority Police Department is requesting funds to purchase three portable Automated Vehicle Identification Systems (license plate readers) that would allow officers to automatically scan and run thousands of license plates against the NCIC database. This system would provide officers with a valuable tool, making the roadways in Maryland safer for the motoring public. With the purchase of this equipment, officers will be able to run thousands of license plates each hour--without contacting the Communications Unit--checking for stolen vehicles, suspended registrations, Homeland Security Alerts and Amber Alerts, as well. This new device, known as "TAG-NABIT," will allow officers to scan plates at residential and highway speeds.

Narrative

1. FPA: This funding request from the Byrne Justice Assistance Grant Program will provide police officers, assigned to the Maryland Transportation Authority Police Department, with the ability to run thousands of license plates each hour. The new technology, similar to an "electronic eye," will allow officers to check for stolen vehicles, suspended registrations, Homeland Security Alerts and Amber Alerts, quickly and efficiently.

2. Problem Statement: Each year, millions of vehicles travel the roadways owned and operated by the Maryland Transportation Authority. The Maryland Transportation Authority Police Department is responsible for the safety of all motorists traveling on these roads. Officers routinely conduct speed enforcement, vehicle investigations and DWI initiatives at various locations throughout the state. With the purchase of three Automated Vehicle Identification Systems, officers would have the ability to identify and investigate a large number of operators who are driving illegally on Maryland highways.

3. Planning Process, Strategy and Time line: In May of 2007, the MdTA Police Department purchased one Automated Vehicle Identification System. On the very first day of operation, an officer recovered a stolen vehicle and arrested the operator. With funding approval, the Maryland Transportation Authority Police Department will initiate the purchase of three units based on an aggressive time line:

   - August 20, 2007--funding approval
   - August 20--equipment order
   - August 27--receipt of equipment
   - August 30-31--training/program implementation

   A state-wide strategy would include enforcement on Interstates 95, 895, and on the roadways leading to the BWI Thurgood Marshall Airport. Other locations throughout Maryland, to include the Port of Baltimore, would be considered for enforcement initiatives. Maryland Transportation Authority detachments located in Anne Arundel County (Bay Bridge) and in Charles County (Nicole Bridge) would also benefit from this new technology. Officers assigned to the Hanover Bridge Detachment, located in Cecil County, and the Commercial Vehicle Safety Unit (CVSU), situated on Interstate 95 in Cecil County, would have the opportunity to use this equipment.

4. Goals, Objectives and Performance Measures: With the purchase of three Automated Vehicle Identification Systems, the Maryland Transportation Authority Police Department will seek to increase the number of recovered stolen vehicles and increase the number of arrests for auto theft. Other enforcement categories will be closely monitored to determine comparison performance measures.

5. Best/Proven Practices: Prior to the May 2007 purchase of the Automated Vehicle Identification System, officers assigned to the Maryland Transportation Authority Police Department were required to "run" license plates, one at a time, through the Communications Dispatcher, or by entering information into the Mobile Data Terminals in the patrol vehicles. The Automated Vehicle Identification System allows officers to automatically scan thousands of license plates each hour, without contacting the Communications Unit. Additionally, this new device which is portable, allows officers to change locations at any time.

6. Budget Work Plan: As soon as grant funding is approved, the Maryland Transportation Authority Police Department will order/purchase three Automated Vehicle Identification Systems. A tentative start-up date for this project is August 30, 2007, dependent on funding approval, equipment delivery and training. The cost per unit is $2,600; the list price for three units is $64,800. The vendor, DataWorks, will provide a 5% discount, for a total cost of $61,860.

7. Local Strategy: As stated in the mission of the Maryland Transportation Authority Police Department, "The mission is to provide Safety, Security and Service to the people who use Maryland's vital transportation assets." In keeping with this philosophy, the addition of multiple Automated Vehicle Identification Systems would provide officers with a new tool, an
Summary
"electronic eye," in an effort to maintain safe roadways in Maryland for the motoring public.

8. Additional Funding: There is no additional financial support related to this initiative.

9. Sustainability. The Maryland Transportation Authority Police Department will assume future operational costs related to this initial purchase. A one-year standard warranty will be provided by the vendor, at no cost to the agency.
