To All:

Everything has been done so that Mick Osborne can issue the PO. The ball is now in his court. Ken with PlateScan advised me yesterday that if he gets the PO in the next few days, then all is good for delivery, installation, and training next month, which will be within the grant "performance period." Looks like we are almost there!

The funding for Insight is 6570-8700-7931-9051 Program 105100 period SFY09. Please make sure that everything is included on one purchase order (plate scan, training, and installation).

As Cheryl stated before here is the funding for the Dell Purchase Order "The funding for the storage (which has to be updated) from Dell is 7870-8700-3417-9051. Please send us the updated quote for our records."

All,
I got the Grant Adjustment Form letter faxed to me today, so we have the approval needed to create the PO.
Again thanks to everyone who helped push this Grant Purchase thru.

Barbara,
I will send you a separate email with the instructions for the PO shortly.

To All:
We are almost there with this order - we finally had one of the vendors get the right product "on contract."
Once we receive notification that the TxDOT piece is OK, we can move forward with getting Mick Osborne at Purchasing to cut the P.O.  Mick had requested additional business case information this past week, and we got it to him.  I will advise you when the next step is reached.

Subject: Insight Quote  

Hello Sgt Tate! Attached is the quote from Insight from US Communities. We've received confirmation that these items are covered under contract, so this is the official quote we will be using. Please pass this on to TXDOT for their approval so that we may move forward with the procurement process.
