Intelligence Note from Domain Management
Intelligence related to MS-13 Locations
September 22, 2008

Approval: SIA

Subject: Mara Salvatrucha (MS-13) in the Newark Division

Summary: (U//LES) The Domain Team assesses that Newark Division’s Area of Responsibility (AOR). Further, the Domain Team assesses that

the Newark AOR. The Domain Team assesses

Scope:

(U//LES) This note characterizes the posed by MS-13 to the Newark AOR. Population assessments, and other MS-13 activity are analyzed using Analysis of help to identify MS-13 presence areas, areas where and MS-13 intelligence gaps. The Domain Team used 2000 Census data to provide Central American population trends, reporting which provides background and perspective on MS-13 activity in the Newark AOR.

Key Judgments:

(U//LES) The Domain Team assesses with a high degree of confidence that

1 HIGH Confidence: Judgment based on direct or high-quality intelligence from multiple sources or from a single highly reliable source, such as high quality imagery, human intelligence, or signals intelligence. High confidence generally indicates that our judgments are based on high quality information or that the nature of the issue makes it possible to render such a judgment.

MEDIUM Confidence: Judgments based on indirect or derived intelligence from multiple sources or from a single reliable source. Medium confidence generally means that the information can be interpreted in various ways, that we have alternate views, or that the information is credible and plausible but not of sufficient quality to warrant a higher level of confidence.

LOW Confidence: Judgments based on little or no information, intelligence from untested sources, or for which there is little or no corroboration. Low confidence generally means that the information is scant, questionable, or very fragmented; that it is difficult to make solid analytic inferences; or that we have significant concerns or problems with the sources.
While MS-13 criminal activity, the Domain Team assessed, as of the date of this report, Newark.

The Domain Team notes that MS-13 in Newark’s AOR is

Bearing in mind there is

Also, within the Newark AOR, it does not appear

Nonetheless, MS-13 is

MS-13 in Newark’s AOR has a crime filled history to include homicides and shootings. In addition, nationwide law enforcement analysis reveals that “wannabe” MS-13 members often end up becoming real MS-13 members, especially after serving prison sentences.

On September 15, 2008, the Essex County Prosecutor’s Office (ECPO) stated gang membership was a “clear motive” for the August 4, 2007 murders of three students in Newark, NJ. Open sources revealed that the ECPO thought the six murder suspects were possibly MS-13 members. A motive was not identified for the murders.

On September 12, 2008, an admitted MS-13 member, was convicted for the September 25, 2005 murder of Manuel Ramirez which occurred in Elizabeth, NJ. According to New York State Police Investigator, who was called by the prosecution as a gang expert, followed gang protocol by exacting revenge for the perceived slight of him and his gang.
□ (U/LES) An MS-13 member from Newark, NJ was incarcerated in the Essex County jail system for homicide.

□ (U/LES) On MS-13 member fired two gun shots at a victim outside of the in South Plainfield, NJ.

□ (U/LES) From February 2007 to May 2008, approximately ten MS-13 members were arrested in the Trenton, NJ. One was arrested for unlawful possession of a rifle and sawed off shotgun. Four MS-13 members from Union City, NJ were arrested in Trenton for driving in a stolen vehicle.

□ (U/LES) During the June 2008 Immigration and Customs Enforcement’s (ICE) “Operation Community Shield,” a member of MS-13, was arrested for possession of cocaine.

□ (U/LES) On 15 June 2005, as part of ICE’s “Operation Community Shield,” fourteen MS-13 members were arrested in Elizabeth, NJ on drug conspiracy charges.

□ (U/LES) In 2002, MS-13 members

□ (U/LES) The Domain Team assesses that Newark’s AOR. This assessment is based upon analysis. Further, population data reflects a large ethnic Central American population.

□ (U/LES) According to the 2007 NJSP Gang Survey, MS-13 is the fourth largest gang in New Jersey, behind in numbers, presence, and activity to (in descending order) the Bloods, Latin Kings, and Crips.

□ (U/LES) Five gangs are reported present in fifty or more New Jersey municipalities: Bloods (211 towns); Latin Kings (118); Crips (112); MS-13 (65); and Pagans (57).

□ (U/LES) In New Jersey’s northern region, the top four gangs reported in municipalities, were: Bloods (77%); Latin Kings (53%); Crips (38%); and MS-13 (34%).

□ (U/LES) In New Jersey’s central region, the top four gangs reported in municipalities, were: Bloods (92%); Latin Kings (56%); Crips (55%); and MS-13 (34%).
New Jersey Hispanic Population Analysis:

(U//LES) MS-13 is comprised of members from Central American countries, primarily El Salvador, Guatemala, and Honduras. According to the 2000 Census, there are 67,320 individuals from these countries living in New Jersey. An analysis of Hispanic populations and from these countries during the time period of January 2008 to July 2008. An analysis of Hispanic populations and helps the Domain Team assess where. The Domain Team assesses that New Jersey has the fifth largest Central American population in the United States.

(U//LES) The large presence of other Hispanic populations in New Jersey and the corresponding gangs they represent may be indicative as to. The Domain Team notes that in Newark's AOR. The Domain Team assesses that ethnic population numbers through which gangs recruit members. For instance, according to the 2000 Census, the largest Hispanic communities in New Jersey are Puerto Rico with 366,788, the Dominican Republic with 91,316, Columbia with 69,754, Mexico with 67,667, and Cuba with 55,241. In addition, there are an estimated 1,265,000 African Americans living in New Jersey from which

(U//LES) The following chart shows New Jersey’s top five Hispanic populated counties.

---

In 2007, The Federation for American Immigration Reform estimated NJ’s illegal alien population at 490,000. The 2000 Census does not provide illegal alien information, so the actual numbers may be higher.
