UNCLASSIFIED
Hello Gents,

Since coming off the recent airborne training, there were a few things that stood out.

Thanks,
Airborne

I was wondering if you could send the Airborne down to me. I have a [redacted] which is still open requesting it.

Thanks for the help.

[Redacted]

[Redacted]
Here is a synopsis of what I have obtained so far. The caveat is that the airborne missions are not recorded in [redacted] metrics. I also cannot locate any data in Sentinel and [redacted]. Therefore, the data I have is based upon an urgent email request that was sent out to the field [redacted]. There may be additional missions that can be reported in the future, when all the [redacted] can respond (the email was sent 06/08/2015). Also, some of the missions might go back as far as when [redacted] had tried to start a nascent aerial capability. At that time, CSS gear was sent to [redacted] and [redacted] had gear, but they sent it back for lack of interest/usage. The POC for that program, [redacted], reached out specifically to those offices in addition to the [redacted] wide email I sent. All offices reported back with the same stats as the ones emailed to me. There may also be airborne missions that involved [redacted] that are no longer in the [redacted] so I cannot say for certain that the mission numbers are 100% accurate. So far, we have five airborne missions reported.

Since this information is going to AD Yakone soon, I thought you should be kept in the immediate loop, but the attached document has not received approval for release yet from [redacted] and A/S [redacted].

Are you going to do an EC for [Redacted] and [Redacted]?
Hey

Hope you had fun in ______ (is that where it was?) this past weekend. Probably not as muggy as ______

My boss gave me some guidelines to work with here in ______ as far as the Airborne WITT training. We propose having the training ______. We would like to have the training at the ______. There is a nice big conference room there and the airplanes ______. My boss would also like to have a couple of the ______ guys attend, one is even a ______ hat would likely be flying, so it would be good for him to see what it is we are trying to accomplish. We would likely have ______ would like to come, and I think ______ mentioned ______ might want to come up for refresher training.

Since ______ and I have already been through the class and would likely be the operators in the sky, I think ______ than the air operations. ______ With weather conditions here, it is sometimes hard to create a schedule and stick to it. It is almost always safe to plan afternoon air operations as the fog has burned off by then, just an FYI. We definitely want to spend time in the air though, that's the whole point isn't it?

If it matters, here is the level of experience of the above mentioned:

Me - Loser extraordinaire, shouldn't even be in the bu. ______ attended ______ and can operate the gear with little or no assistance ______ has attended no training, but can operate the gear with some basic assistance. I spent some time with ______, showing him the gear. ______ attended regional basic witt as an auditor and can operate the gear with some basic assistance, I have spent some time training her. ______ has not attended any training, but is interested in the witt program. ______

________: My boss, has been on a couple of missions and is familiar with what we do. He is the former ______ and is ______ certified. Very supportive of the program and it would be good for him to know what his crew is doing.

________: Has not been to any WITT training, but has ______. ______ Has also flown on all the airborne witt training/missions in ______ and will likely continue to do so until and if he moves to the ______. ______: Has shown a good deal of interest in the ______ program and is a hard worker. ______ thought he would benefit from the training.

As far as the ______ we would have to do a quick background on the ______ folks, unless they have a clearance. If they have a clearance, all they would have to do is sign a non-disclosure agreement regarding the ______. If they don't have a clearance, let me
know and I'll begin the paperwork...

Let me know what you think. Thanks.

All,

I’ll start the coordination, but I will need some information first. Certification is at best a loose term. Does the X need radiation, emission or airframe certification, or all of the above? I can contact our flight groups to get the aircraft models we fly but will need a POC for that information, from there I can contact X. There is also a good possibility X will want a government sponsor to go with them to the FAA. It may be best to start communications with the FAA in parallel.
