Classification: UNCLASSIFIED//FOUO

Hello,

I mentioned I contact you to arrange a date to provide information on the airborne capability (cellular location). We’ve had some success in deploying these systems and I’d like to come by and provide information on how the concepts have worked out for awareness.

Let me know if any of the days/times listed below work for you. I’d probably need about an hour to go over the information.

- 07/09: all day (pick a time)  
- 07/10: 9-11am  
- 07/11: all day (pick a time)

Thanks,

BBerry:

P.S. Could you send me the address and phone number to call once I arrive.
We no longer have a specific program for aviation but [redacted] is one of our Program Managers and can advise on this program. Please coordinate this with [redacted] and I will attend if I can. Thanks.

Unit Chief: Field Flight Operations Unit

Subject: Meeting Request --- UNCLASSIFIED//FOO

Classification: UNCLASSIFIED//FOO

I’d like to come by and go ahead and talk about the current [redacted] program and the outcome of how we’re doing on the airborne concepts. I believe I can also supply a laptop demo/example of how it works as well in airborne platforms.

Would you available next week on Tuesday or Wednesday for the briefing/talk.

Probably take about an hour.

Talk to you later,

P.S. I can come up to your place and do the demo, just send me the address and I’ll show up.

(U//LES) I would like to get on calendar an internal OTD meeting about Airborne... I would just like to have a “initial” meeting to communicate the scope of this effort, which may help drive our other meetings.

Perhaps a quick ½ hour discussion would suffice.

I’m available all of next week and week after (except 06/24). If you let us know a date/time that would work, we’ll send out the invite to get it on calendar.
Yes. Please include me.

Just wanted to check with you prior to engaging anyone about this. Should we schedule a meeting about this since [] and [] was asking?

Perhaps a meeting to re-enforce that the same concepts are being used would alleviate concerns.

Thanks,

In an effort to move these issues along—Airborne Development has asked his Section Chief for availability for briefings by us of applicable OGC POCs. These briefings will likely need to be at JEH—not on Friday afternoon.

I will keep you posted and work with Scott to get them scheduled at a time convenient to you.

Thanks,

Airborne --- UNCLASSIFIED

SentinelCaseld: NON-RECORD

Classification: UNCLASSIFIED

As you are probably aware we had the [REDACTED] last week and WITT was a major player in the case. I was asked by our Pilot-In-Command about the availability of the airborne system. You and I have discussed this in the past and I remember that Aviation Surveillance Unit needed to approve the system or something along those lines. What is the current status of the airborne program?

Let me know
Many Thanks

Hello

Thanks
The DTA does not call out for the group to approve or disapprove the use of equipment for domestic technical assistance to state and local cases. Because your question pertains to the potential disclosure of techniques and tradecraft in state proceedings, I would defer your concern to our general counsel and division heads. I would suggest your CDC to consult with OTD OGC for better guidance.

Classification: UNCLASSIFIED

==================================

TRANSITORY RECORD

All,

The Aviation Policy Implementation Guide (PG) has been submitted for a second collaboration. The purpose of this collaboration is to review the changes/updates made by the SME, after the Aviation PG was submitted for final edit. Also, because this is the second collaboration of the Aviation PG, the collaboration period is limited to 10 days. The new end/due date for this review is November 8, 2013.

Understandably, you may want to read the document in its entirety for context; however, to assist in keeping the November 1, 2013 due date, the division policy officer (DPO), has highlighted and marked the updates with the comment NEW initials are ___.

Finally, please be advised that if your original comments/recommendations were accepted by the SME during the first collaboration, those changes have been incorporated into this version of the PG.

Thanks again for your time and patience.

------------------------------------------------------------

Please review the CPO Policy Collaboration Site for the following policy: FBI Aviation Policy. Please input your comments on the collaboration/wiki page by selecting the "Discuss" feature at the top left, above the Collaboration End Date. Please note that you have 10 calendar days to complete this review.

To add additional reviewers during the collaboration period, go to 'FBI Aviation Policy' and select the down arrow at the bottom of the form to add an "interested user" to review the policy. Type the last name of the individual and then select "Search." Double click on the appropriate name and the email address will automatically populate the email address field. Repeat until all individuals have been added. Save the form and assigned individuals will automatically receive email alerts to the review the assigned policy. Then, exit the screen.

101

EFF CELL-365
When your division review is complete, DPOs, please ensure that you have entered a comment on the wiki page, even if it is to state that your division has no comment. Then go to 'FBI Aviation Policy' and check the appropriate box at the bottom of the form. Thereafter, select the save button and exit the form.

Contact the Corporate Policy Office at HQ_DIV00_CORPORATE_POLICY_OFFICE or your Division Policy Officer if you have any questions.

what do you think of the summary? Why did it take nearly two months for me to be provided with only more questions and for the substantive meeting with Aviation to be scheduled? Am I really expected to tell the field that we won’t endorse airborne.

Here is my summary of the Aircraft Project as a whole.
Have a good weekend,

If you have any questions feel free to call me
Have you given up on [ ] for this, then?

(please do not distribute further).

Previously [ ] me and [ ] met with [ ] on the subject, and I determined that the next steps were to do the following: (I actually had buy-in on this plan previously from [ ].

I still plan on doing the same list of tasks described above, although at this time I have only provided information to the team to gain an understand if anyone is willing to take on this task. I heard from [ ] but it was more of an unstructured, get it done, and don’t worry about anything solution.

From attending the meeting with [ ], I learned that there are a great amount of details required to implement this properly. It seems that [ ] will want many standard operating procedures followed, which at this time was not being “comprehended” by anyone in [ ]. I have explained some of these complexities and look-ahead’s that need to be thought of, but up to this time, I only was offered an unstructured shot-gun approach by [ ] and no other personnel in [ ] volunteered.

I am still in the identification process for identifying the right personnel for this task, that will follow through in a timely fashion, without over “over-specifying” the capabilities.
My inclination is to assign [ ] this task as I see that he has the proper experience in installations and adhering towards standard operating procedures. Should this be more urgent, I can move forward with a faster schedule, although this will require helping [ ] with myself or another [ ] engineer, as he is unaware of all the technologies [ ] has to offer (since he is new). I also have noticed that [ ] has a high technical background, as has shown reliability in his ability to understand and operate [ ] equipment at the detail necessary.

By the way, I have already asked [ ] to be our POC to start learning technologies that will help integrate [ ] in a phased approach that will address capabilities and provide for the necessary guidance with respect to disclosure, protection of equipment/techniques, and of course maintaining proper legal processes.

I have offered this to the other team members, although with respect to their current tasking, I don’t see much leeway without getting involved myself.

Between us: [ ] is fully tasked, else I would have depended on him to take lead in this task. I don’t believe that [ ] will take the time to implement the required structured approach, which I noticed [ ] was taking with [ ] is also very busy with his own contracts, and should not take on anymore tasks, and would not have the time to focus on this properly.

Thax

UNCLASSIFIED
Thanks for the update and confirmation. If there is anything I can do to help, just ask. I know you have competent people back there who are more than capable of putting together a program and testing the gear, but I also know they are very busy, so I am willing to help where I can.

Bottom line is coming along nicely and makes himself available for almost every mission, and I can talk through it over the phone if I need to, but I will keep adding to the team as I am able.

Thanks for the concern, and again, let me know if there is anything I can do to help,

S/

Do you want me to get with and get you some help??

see me today..
I think that answers all your questions and addresses my concerns. Please let me know if I left anything out,
I hope I have not confused everyone, bear with me. TTU has provided many WITT capabilities to the field and our concept is:
If you have any questions feel free to call me

Hello and

Thanks for the airborne training last week. It went very well.

Thanks,
