Guidance on Future Production of ADAs

After careful review of the ADAs, in conjunction with numerous other intelligence products and processes such as the SPS sessions, DI Executive Management has decided that the ADA will not be required for submission to FBIHQ in 2010. This decision was based upon numerous factors to include that information contained in the ADA is also being provided to FBIHQ.

The DI appreciates the exceptional effort put forth by the field as we continue to meet our new intelligence challenges. Any questions or concerns regarding the guidance provided in this communication should be brought to the attention of your division DPMU Program Manager.
