~~(S//SI//REL)~~ Collection continued [REDACTED] after an Attorney General authorization had expired [REDACTED] and there is no evidence that [REDACTED] intercepts were collected between [REDACTED] when the violation was recognized. The intercepts were deleted from the [REDACTED] and [REDACTED] data storage systems on [REDACTED]. The intercepts were not accessed [REDACTED]. In all but one, email addresses [redacted] belonging to legitimate foreign targets, whose foreignness was confirmed at tasking, were determined to be in the United States. In one instance, the foreignness of valid targets was not confirmed when PAA was implemented, resulting in unauthorized tasking from [redacted]. Collection for all the incidents was terminated upon recognition, and databases were purged of the information.

## 2. (U//FOUO) NSA OIG Intelligence Oversight Inspections, Investigations, and Special Studies.

(U//FOUO) During this quarter, the Office of Inspector General reviewed various intelligence activities of the NSA/CSS to determine whether they were conducted in accordance with applicable statutes, Executive Orders, Attorney General procedures, and Department of Defense and internal directives. With few exceptions, the problems uncovered were routine and showed that operating elements understand the restrictions on NSA/CSS activities.

(S//SI//REL) [REDACTED] Intelligence Oversight is degraded by the absence of clearly delineated roles and responsibilities for the [REDACTED] Intelligence Oversight Program Manager and organizational points of contact. The organization lacks documented processes and procedures for timely reporting intelligence oversight incidents and violations, and there are no documented procedures for tracking intelligence oversight training; therefore, accounting for personnel who require the training is incomplete. Finally, [REDACTED] is not complying with intelligence oversight measures detailed in [REDACTED] agreement with the SIGINT Director regarding a [REDACTED]. The NSA/CSS Inspector General will update in a future report actions taken by [REDACTED] to correct the inspection findings.

## (TS//SI//REL) Misuse of the U.S. SIGINT System. [REDACTED]

[REDACTED] intercepted the communications of an unidentified individual calling a targeted telephone. Based on the content of the call, NSA analysts [REDACTED] do not believe this is a random telephone call, but rather a misuse of government information by a witting individual [REDACTED]. This matter was reported to the Department of Defense General Counsel [REDACTED] for an investigative determination. The incident has not violated U.S. person privacy rights but is reported because of the misuse of the U.S. SIGINT System.

**(U) Special Study on Retention of Domestic Communications Collected Under FISA Surveillances.**

~~(C//NF)~~ While conducting collection operations authorized under the FISA of 1978, as amended, NSA incidentally collects domestic communications, subject to retention limitations. Although NSA information systems can be programmed to facilitate compliance with retention limitations, the Signals Intelligence Directorate is not fully using information system capabilities to do so. The OIG did not detect major instances of domestic communications in conflict with minimization procedures; however, we determined that the risk is high for noncompliance. The OIG found that appropriate training on how data repository system capabilities can aid analysts to comply with retention rules [redacted]

[redacted] The OIG also found that developing an FBI-Compatible Dissemination System could lower NSA's risk of noncompliance. A future report will update actions taken to correct the study findings.
