- Asking for traffic
- Engaged with target
- Discovered Botnet with malware analysis & SIGINT
- Outcome: Charges, arrest, conviction
#OperationPayback

[11:26] [redacted] Anyone here have access to a website with at least 10,000+ unique traffic per day
[11:27] [redacted] admin access to it?

Private Messages

[11:28] [redacted] maybe, what do you want it for
[11:28] [redacted] What's the traffic rate?
[11:28] [redacted] It'll help the Op
[11:29] [redacted] mine got 27k per day yesterday (pr0n)
[11:29] Love it
[11:29] [redacted] Using TPG's?
[11:30] [redacted] it's here [redacted]

[11:32] [redacted] Pretty much it's a cryptic iframe which will attempt to attack all PC's heading to that website.
[11:32] [redacted] If they have vuln software they're added to a net that is used for OP Paybacks DDoS artillery
[11:32] [redacted] so you will use exploit or some javascript thing?
[11:32] [redacted] If they are not vuln then nothing happens
[11:32] Yes
[11:33] The frame is obfuscated JS

[15:16] <GZero> yo
[15:16] <GZero> __ works with me
[15:16] <GZero> I need traffic
[15:17] <CHIS> what for?
[15:17] <GZero> exploit pack
[15:17] <GZero> will pay you if traffic is good
[15:17] <GZero> u wanna talk?

[15:18] <GZero> http://alpha.b0x.su/hits.txt - Need to make this bigger ;)
[15:19] <GZero> U have traffic?

[15:21] <CHIS> so what is at that page anyway?
[15:21] <GZero> several exploits
[15:21] <CHIS> yeah I've got traffic. got 92k hits yesterday.
[15:22] <GZero> ok
[15:22] <GZero> lets talk :p

- JTRIG & SIGINT reporting lead to identification, arrest
- Sentenced for 2 years – April 2012

Hacker jailed for stealing 8 million identities

Summary: A British hacker has been sentenced to 26 months for stealing 200,000 PayPal accounts, 2,702 bank card numbers, as well as 8,110,474 names, dates of birth, and postcodes of U.K. residents.

23-year-old Edward Pearson of York, Northern England, will spend two years and two months behind bars for his hacking spree. The sentence would have been greater if he made more use of the huge amount of stolen data.

The British hacker used the Zeus and SpyEye Trojans to steal confidential data from U.K. victims between January 1, 2010, and August 30, 2011, from an undisclosed source. On his computers, police found 200,000 stolen PayPal accounts, 2,701 bank card numbers, as well as 8,110,474 names, dates of birth, and postcodes of U.K. residents. If all the details of what he had harvested were printed out, it would fill 67,500 double-sided A4 pages, according to authorities.
p0ke

- Discussing a database table labelled ‘FBI’, in Anon Ops IRC
- Engaged with target – exploiting US Government website, US company website

#OperationPayback
[19:40] <p0ke> Topiary: I has list of email:phonenumber:name of 700 FBI tards
[19:40] <p0ke> :P
[19:41] <Topiary> what about passwords?
[19:41] <p0ke> It was dumped from another gov db, Topiary
[19:41] <p0ke> A table named fbi
[19:42] <Topiary> ah, like an FBI affiliated contact userbase?
[19:42] <p0ke> that was all it contained D:
[20:04] what was the site?!
[20:04] if its special ;)
[20:04] <p0ke> usda.gov

[20:08] (did you get past the site db tho?
[20:09] <p0ke> Yep
[20:13] so u had a poke around on the network? lol
[20:13] <p0ke> meh a lil

IO Outcome

- CHIS with
- 80% of those messaged where not in the IRC channels 1 month later
Conclusion

- Team working – SIGINT, JTRIG, CDO, INOC – was key to success
- Online Covert Action techniques can aid cyber threat awareness
- Effects can influence the target space
