Once EOD arrived they successfully control detonated the car in place and then evaluated the damage and looked to see if there were any additional explosives or weapons in the car. Once it was determined that there were no explosives, Once the EOD was leaving, there were shots fired on the east and the cordon directly on RTE . I observed a small white car headed towards us. It was moving at a high rate of speed. Both our soldiers and a group of Irag soldiers nearby yelled for the car to stop. The car continued towards the security/blocking position at the same high rate of speed. Again our soldiers and the Irag soldiers continued to yell 'Stop' in the Arabic language. They also made the physical gesture to stop. At 100 meters I observed and heard one warning shot fired. The car still continued forward at the same high rate of speed. Several shots were then fired in rapid succession. The car then slowed and collided to a stop about 15 meters away from the security position with the front end pointing towards the median. I then observed 3 women and one man exit the car. The women were dressed in black and the man in white.
