The investigating officer (Investigating Officer), after carefully considering the evidence, finds:

As the appointed investigating officer for 16339, AR 15-6, No. 05-239, I have completed my investigation of the aforementioned matter and submit my report in the following format: FACTS, FINDINGS and RECOMMENDATIONS.

FACTS: On 24 JUNE 2005, at approximately 1136 hours, members of 16339 and members of 16339 were conducting a joint security patrol in the area vicinity of军事网格. While the patrol was in route to conduct Mosquit monitoring operations, a shot was heard and a local national was spotted on a roof top at the aforementioned grid coordinate, which is located on the South east intersection of Routes 16339 and 16339. The patrol leader, immediately halted the patrol, set the patrol members into habit overwatch positions and the patrol began clearing the building in which the local national was observed. (EXHIBITS C8) The patrol had received direct fire in the same area on 23 JUNE 2005. (EXHIBIT C3). While members of the joint patrol cleared the building, the remaining members provided an outer cordon. The patrol's and his spotter, occupied positions along the outer perimeter of the building. Several CP and IA soldiers occupied positions along the south side of Route 16339 or Route 16339. (EXHIBIT B). Both CP and IA soldiers were stopping all west bound traffic on Route 16339 that might enter the outer cordon that the joint patrol had set. One vehicle had stopped in the middle of Route 16339 approximately 100 meters east of the outer cordon. (EXHIBITS C1, C2, C4). A Daewoo Espora, white in color, bearing a damaged license plate, driven by , traveled around the stopped car 100 meters to the east of the established cordon headed in a westerly direction towards the joint patrol. As the vehicle approached the outer cordon personnel, at a high rate of speed, audible and visual signals were given by members of the patrol for the vehicle to stop. As it by-passed the stopped vehicle parked in the road a warning shot was fired by . The vehicle continued to approach the outer cordon and ignore verbal and visual commands to stop. As the vehicle approached without slowing, fired a disarming shot to the right front tire, while fired into the grill of the vehicle. These shots were fired when the vehicle was approximately 70 meters from the outer cordon. The vehicle’s rate of speed towards the joint patrol’s outer cordon did not change and it continued to ignore all displayed commands to stop. (EXHIBITS B1, B2, B3, B4, B5, C1, C2, C4) When the vehicle reached approximately 40 meters from the position occupied by , it fired his weapon, with a point of aim being the drivers head. The vehicle began to slow down. When the vehicle reached a distance of approximately 20 meters from the intersection of Routes 16339 and 16339, an IA soldier ran out into the street and fired point blank into the vehicle. The vehicle traveled only a few more meters and came to a halt. Joint patrol soldiers searched the vehicle and found the driver to be dead. Only personal effects of the driver were found in the vehicle. (EXHIBIT C3, C4). After the inspection of the vehicle and the incident report, the joint patrol forces left the area to continue with their mission. (EXHIBIT C9)

FINDINGS: After careful review of all available evidence and interviews with all available witnesses, I report the following findings. The patrol was very familiar with the area of operations. The patrol had been in contact numerous times in the vicinity of the incident. The patrol had tried on all occasions to gain PID of the suspect but no avail. As the patrol was fired upon on 24 JUNE 05, all actions of the patrol had to be carried out in a most expeditious manner. Speed being essential in an attempt to apprehend or kill the AIF sniper. It was also essential in an effort to force protection of the patrol that they move into and occupy outer cordon security position hastily, as the location of the sniper was unknown. HMMVs were used to block the southern, northern and western high speed avenues of approach. Dismounts were utilized to block all traffic from the eastern direction. This attempt to gain PID of the sniper did not afford the ability to place barrier materials in the eastern flank of the objective due to the requirement for speed of action. It is evident that the units and in the area of the incident site until a complete traffic jam over with the local authorities or another unit was accomplished. By leaving the described subject in plain view and leaving the area, the unit would not have had a positive impact on the local populace. I have no further recommendations.

SECTION V - RECOMMENDATIONS

In view of the above findings, the investigating officer hereby recommends:

RECOMMENDATIONS: Leaders must continue to stress to soldiers to utilize the graduated response threat matrix and continue to train them in the proper use of the ROE. Leaders must also continue to stress the importance of maintaining full situational awareness, as complacency will take its toll on our soldiers should they become such. However leaders must ensure that though they must teach and enforce the standards of the graduated response matrix they do not by any means instill in their soldiers hesitation. Situational awareness will provide our soldiers the ability to make the right decision at a critical moment, whereas hesitation at a critical moment would severely cost life or limb, neither of which we can afford. It is recommended, however, that the unit be trained in proper consequence management. The unit, at a minimum should have remained at the incident site until a complete traffic jam over with the local authorities or another unit was accomplished. By leaving the described subject in plain view and leaving the area, the unit would not have had a positive impact on the local populace. I have no further recommendations.
Continuation of Section IV- FINDINGS (para 3-10, AR15-6)

I also find that all of the Rules of Engagement were followed in that the unit utilized the graduated response threat matrix in their attempts to stop the oncoming vehicle. The unit first utilized visual and audible signs, to no avail, then fired warning shots which rendered no positive response. As the vehicle closed to within 40 meters the soldiers were left with only one option, the use of deadly force to deter the perceived threat. (EXHIBITS A-A16) I find that the fatal wound to the subject's head was delivered from the shot fired by [REDACTED]. I also find that the wounds to the subject's right hand were caused by the shot fired by [REDACTED], which is clearly indicated by the implosion of glass into the vehicle. (EXHIBITS A15-A16) It is also evident by the wound on the subject hand. (EXHIBIT A16) The IA soldier who fired point blank into the vehicle was identified, but refused to admit that he in fact fired into the vehicle, though several eye witnesses observed his actions. (EXHIBITS C, C3, C4)

لم يسبق لي يوماً ما رأيت مثل ما رأيت اليوم في نزاعات أوروبا. إن هذه المعركة جمعت بين الولايات المتحدة والاتحاد الأوروبي، حيث نرى تأثيرات من طرفهما.

هذا النزاع يعود إلى عقود من الحروب والنزاعات في الشرق الأوسط، حيث يتفاعلون مع بعضهما البعض بطريقة غير منطقية. إن نسخة جديدة من العقايق والمنافسة تأتي في الوقت الذي يطالب العالم بالعمل الجاد.

في هذه الظروف، إننا كنا نتطلع إلى حل صحيح وتعاون مع الجميع.

I am a private pilot, from [redacted], I wanted to discriminate [redacted]. The incident occurred at 49.30 Friday 6/25/2005.

During working forces at Al-Mah-El-Stain, Kassass Al-Madafi st, I saw while driving near crossroad very fast close to our police car near crossroad I have [redacted] have stop him because he is very fast, I ran toward the driver and stop him. At this time a [redacted] shot him and kill him immediately. I didn't shoot him later they a friend that he had his car bullet all over his body the pat. didn't put any signs that the road.
At around 11:36 hrs myself and [REDACTED] were overwatching a building at [REDACTED] while soldiers from [REDACTED] and Iraqi army soldiers searched the building. We had multiple vehicles approach our position on a side road from [REDACTED] and an Iraqi soldier would motion the vehicles to stop and they would stop. While we were in the process of signaling a vehicle that we had stopped to turn around we noticed a vehicle approaching at a high rate of speed approx. 40 mph and the Iraqi soldier started yelling and waving the vehicle to stop. The vehicle was approx. 150 m from our location. The vehicle continued at a high rate of speed. [REDACTED] then fired a warning shot at the vehicle he continued at the same speed. I then fired a shot at the road in front of the vehicle. The vehicle kept coming and never slowed down. When the vehicle was approximately 70 meters, I fired a round into the engine and [REDACTED] shot out the right front tire. The vehicle continued on at the same speed. At this time I saw the vehicle...
Statement of [Redacted] Taken at BAGHDAD, IRAQ Dated 6-24-05

Statement (Continued) swerve around the car nearest to us and the driver seemed to crouch down behind the steering wheel. I felt threatened by the vehical being either a VBIED or the driver attempting to run us over. Then I heard the Iraqi Army soldier shoot at the driver and I fired my third shot into the front windshield the vehical was approx. 30 meters when I fired my third shot. The vehical came to a stop and we noticed the driver was hit in the head.
