**REPORT OF PROCEEDINGS BY INVESTIGATING OFFICER/BOARD OF OFFICERS**

For use of this form, see AR 16-6. The proponent agency is OTAG.

*IF MORE SPACE IS REQUIRED IN FILLING OUT ANY PORTION OF THIS FORM, ATTACH ADDITIONAL SHEETS*

**SECTION I - APPOINTMENT**

Appointed by: COL [REDACTED]  
(Appointing authority)

Date: 26 OCT 05  
(Attach inclosure 1: Letter of appointment or summary of oral appointment data.) (See para 3-15, AR 15-6.)

**SECTION II - SESSIONS**

The (investigation) board commenced at FOB [REDACTED] Ira at 0900  
(Place)  
(Time)

Date: 27 OCT 05  
(If a formal board met for more than one session, check here: Indicate in an inclosure the time each session began and ended, the place, persons present and absent, and explanation of absence, if any. The following persons (members, respondents, counsel) were present: (After each name, indicate capacity, e.g., President, Recorder, Member, Legal Advisor.)

The following persons (members, respondents, counsel) were absent: (Include brief explanation of each absence.) (See paras 5-2 and 5-8a, AR 15-6.)

Date: 27 OCT 05  
(Time)

The (investigating officer) board finished gathering/hearing evidence at 1300  
(Time)  
(Date)

and completed findings and recommendations at 1700  
(Date)

**SECTION III - CHECKLIST FOR PROCEEDINGS**

SECTION IV - FINDINGS (para 3-10, AP 15-6)

The (investigating officer) (hereinafter), having carefully considered the evidence, finds:

that the escalation of force incident on 26 Oct 05 resulting in the death of two Iraqi local nationals and the wounding of two Iraqi local nationals by 3/A/1-64 AR was not the result of negligence and that the Rules of Engagement were properly followed.

On 26 Oct 05 at 1800, A company departed for OBJ (in order to identify IED cells and activity in ...). A deliberate planning process was conducted and a mission brief was executed. (Exhibit C) 3rd Platoon, A Company occupied OBJ (IAW the scheme of maneuver shown in Exhibit B). M114 A35 was positioned on PL oriented to the southwest. As per company SOP, three lines of colored chemlights were placed across the roadway to warn local nationals of the ongoing coalition operation and to provide clear delineation for ROE responses. At (blank) meters from (blank), a line of red chemlights was placed to warn local nationals of coalition presence and to provide a marking for (blank). (Exhibit D). At (blank) meters from A35, a line of blue chemlights was placed to further warn local nationals and to demarcate where the common area was located for the U.S. forces. Lastly, at 50 meters in front of (blank), a line of green chemlights and traffic cones were placed to provide proper visibility and a marking for (blank). Additionally, A35 was parked in the open with its flashing hazard lights turned on. (Exhibit D). At approximately 1845, vehicle headlights approached A35 blocking position. Initially the crew of (blank) SGT and PFC attempted to warn the approaching vehicle (blue truck) by flashing the M114's headlights and flashing PFC (name) (firelight). As the vehicle neared the line of red chemlights, PFC fired a round from his shotgun into the air to warn the vehicle's driver as per SOP. (Exhibit E) This vehicle then recognized the situation and came to a stop. A vehicle (KIA Sportage) behind the first vehicle, which was not visible to the crew of (blank), then pulled around the bongo truck in order to pass it. It became visible to the crew of (blank) as it passed the line of red chemlights. PFC immediately fired a warning shot into the air with his shotgun per SOP. The Sportage failed to halt. As the vehicle neared the line of chemlights, PFC fired a burst of 7.62mm with his M240B into the pavement to the right (gunner's perspective) of the Sportage. As the shots were being fired, the Sportage turned to its left (vehicle driver perspective) into the line of fire. As a result of this maneuver, the ricocheting bullets struck the Sportage. The vehicle then came to a halt just before the line of chemlights. The forces on the ground then moved to the vehicle to assess the situation. Inside the Sportage were two local national children KIA (male) and (female)) and two local nationals wounded (mother) (male child). (Exhibit A) The casualties were quickly assessed, treated and evacuated to FOB (blank) for further treatment. Both WIAs are currently at the (blank) LSH and in stable condition.

The crew of (blank) followed the ROE in this incident. The blocking position they established was not fully in compliance with TCP standards published in Brigade FRAGOs (and) OPRORD (and) The published standards by both brigade and division focus on Traffic Control Points (TCPs) which have the purpose of controlling and/or inspecting vehicles in a specific area. Thus the guidelines provided focus on (blank) that are not applicable to blocking positions. Brigade FRAGOs does state that "snap TCPs should have a mechanism that will cause a vehicle to stop or be damaged prior to reaching a point where shots must be fired."

Though still not addressing blocking points, I believe this same concept can be applied to blocking positions. Despite the fact that the blocking position was not IAW the TCP standard, I believe that the crew met the intent of the standard. They had clearly marked chemlights and visible hazard indicators (vehicle hazard lights). The escalation of force on the bongo truck was executed with precision and resulted in the desired result of a non-incent. The obstructed view of the KIA Sportage and its impatient and poor driving skills resulted in the fastened encounter and subsequent engagement. With only a little over 100 meters between the potential hostile threat and the U.S. vehicle, SOP and ROE dictated that warning shots be utilized. The rapid turn of the vehicle caused it to move into the line of warning shots resulting in injury and death. The one area that could be improved is the use of a disabling or warning barrier as published in the new Division FRAGOs which addresses blocking positions as well as TCPs. A limited number of spikes strips were finally distributed in September to the battalion and these can help address that issue to a degree though the number is not sufficient for all situations. (cont.)

SECTION V - RECOMMENDATIONS (para 3-11, AR 15-6)

In view of the above findings, the (investigating officer) (hereinafter) recommends:

that no further action be taken. The ROE was properly followed and a potentially hostile vehicle stopped with no injuries to U.S. forces. I recommend that traffic cones be placed in the first row of chemlights in order to help mark the presence of U.S. forces and that laser pointing devices be present at all blocking positions to assist with visual warning. Additionally, the company SOP for blocking positions should incorporate a disruption barrier of some type (spike strips, sandbags, etc.) with METT-TC factored into the mission planning to account for different situations that may arise. Overall, A Company's SOP is sound and should be continued in the future for force protection needs.
AR 15-6 Investigation Findings Continuation Sheet
26 OCT 05 Escalation of Force – A/1-64 AR

In lieu of spike strips, a line of sandbags or a similarly portable disruption barrier could serve to provide further warning to local national drivers. Of course these TTPs are mitigated by the limitations of the dense urban terrain and the limited visibility during night operations.
SECTION VI - AUTHENTICATION (para 3-17, AR 15-6)
THIS REPORT OF PROCEEDINGS IS COMPLETE AND ACCURATE. If any voting member or the recorder fails to sign here or in Section VII below, indicate the reason in the space where his signature should appear.

MEMORANDUM FOR Commander, 2d Brigade Combat Team, Camp [redacted] Iraq

SUBJECT: Recommendation in the case of the Alpha Company Escalation of Force Incident on 26 October

1. I have reviewed the attached AR 15-6 Investigation in its entirety. After considering the findings and recommendation of the Investigating Officer, I make the following recommendation:

Sir, I concur fully with the findings of the PIR. The company mission was thoroughly planned, briefed to me and fully rehearsed. Company and battalion SOP regarding visual warning for the outer corral was followed. Proximate cause appears to have been the impatience of the Iraqi driver who sped past a stopped truck. I believe ROE were followed and all soldiers acted correctly despite the tragic outcome.

2. POC for this memorandum is the undersigned.

9. I, [xxx], WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:

   The company TTP for night-time TCP/escalation of Force revolves around a graduated response based on the distance of an
   oncoming potential threat vehicle to the stationary friendly vehicle/element. When possible, a method of visual signals
   is used distinguish a [xxx] from another [xxx] which I describe as the [xxx] and a [xxx].

   These [xxx] can be distinguished by cones, concertina wire, or chenlghts depending on the situation and circumstances.
   Ideally the [xxx] is approx [xxx] from the friendly element/vehicle, the next line, what I call the "[xxx]", is approx [xxx] and [xxx] out and the [xxx] is at around the [xxx]. When a vehicle approaches the
   [xxx], the actions taken are to flash the headlights or gain the drivers attention with a laser pointer. When
   the vehicle crosses the [xxx], ideally [xxx] are fired into the air or M16/M4 shots are fired warning shots are
   fired into the air. The next elevated response is to shoot to disable to car then to kill the occupants if the vehicle does not stop. All
   measures are taken to get the attention of the driver and shots to disable/kill are the last response when the friendly element feels
   threatened. The time that a vehicle can travel from the [xxx] is merely a matter of seconds depending on the vehicle speed.

9. [REDACTED]

I WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:

The company TTP for night escalation of force is a series of [REDACTED] are made with [REDACTED] separation between them. The first is [REDACTED] established approximately out from the vehicle. At that line, hull lights are flashed, along with Tac lights. The second [REDACTED] is approximately [REDACTED] out. At that [REDACTED] warning shots are fired, 5.56 or 7.62 off to the side of the vehicle. The last [REDACTED] approximately [REDACTED] out. Crossing this [REDACTED] authorizes deadly force where 7.62 is fired to disable the vehicle. Proper escalation of force TTP's were followed on Oct 26 2005. The 7.62 warning shots fired, after the [REDACTED] ricocheted and struck the vehicle. Nothing follows.
