

Im writing you in regards to the lack of attention Ive received for an injury I sustained while in your custody which has led to two trips to the E.R. I have a broken facial bone that I was ordered to see a specialist to fix to prevent potential facial paralysis and chronic pain issues within two weeks of the injury. It has been over three weeks and yet no action has been made by your medical staff to see that I get to the specialist I was ordered to see by the Cass Regional Hospital on both 12/8/19 and 12/9/19 in my discharge papers the E.R. provided me that went to your medical staff and is a part of my medical files seen by Dr. Voss of your jail on 12/9/19. At which time I was told that they would get me to said specialist. This injury is constantly causing me severe pain and is not something I can let go unfixed just because Im in your custody. Sir Im asking that you please consider releasing me from custody with a signature bond so I can seek the proper medical attention as soon as possible. Im aware that you may be reluctant to do so because of my past behaviors. But I swear to you that I will not disrespect you or your court by missing another of my court hearings if youll please help me in this issue. My next date to see you isnt until Feb 4<sup>th</sup> but I was hoping you could see me alot sooner so I can get this injury properly fixed before its too late. Thank you for your time and I hope God will help you in making the right decision in this matter.
